

GAME MASTER HINTS

Guiding questions if players are stuck:

- Look closely - what do the comments have in common?
- Maybe the first letter of each comment matters?
- The feedback hides more than just opinions.
- Try reading the first letters of the first few comments, top to bottom.
- What generation could this be pointing to?
- There's a pattern forming - can you find it?
- Five comments... five letters... coincidence?
- You're decoding feedback from your target audience.
