

INTERNAL PRESS RELEASE

Sent: 3 hours ago

Target: Digital & Environmental Response Unit

Priority: Urgent System Malfunction

Mission type: Cooperative Puzzle

PRESS RELEASE SUMMARY

We need your help! An unexpected system crash has corrupted the Eco-Awareness App. Our digital hub for sharing sustainable actions, eco-facts, and community challenges has stopped working. The feed is now overflowing with clickbait, misleading green claims, and fake posts sponsored by unknown sources. The algorithm has gone rogue, hiding verified content and boosting false trends.

Your team has been called in as **digital content responders** to fix the issue before the next global update. You will need to analyse suspicious posts, rebuild password security, fact-check eco-claims, and restore the sustainable content flow. Only by decoding the hidden messages can you **reboot the app and bring the Eco-Feed back online**.

YOUR OBJECTIVES

1. Sort real environmental content from misinformation.
2. Rebuild the system's security and recover digital access keys.
3. Debunk false eco-claims using logic and teamwork.
4. Repair the content algorithm and restore balance to the feed.
5. Unlock the final eco-code and trigger the reboot sequence.
